

BIMUKTI MOZZUMDAR

New York, NY | (934) 218-9593 | bimukti.mozzumdar56@myhunter.cuny.edu

Portfolio: b-mozz.github.io

EDUCATION

CUNY Hunter College

Expected December 2027

Bachelor of Arts in Computer Science, New York, NY

GPA: 3.93/4.0

Honors: Thomas Hunter Honors Program, Dean's List (Spring 2024, Fall 2024)

Relevant Coursework: Data Structures & Algorithms, Software Analysis & Design, Computer Architecture

TECHNICAL SKILLS

Languages: Go, JavaScript, Python, C++, PHP, HTML5, CSS3

Frameworks: Node.js, Express.js, Docker, Streamlit, Pandas, Matplotlib, Folium

Tools: Git, MySQL, RESTful APIs, VS Code, Heroku, Google Cloud Platform, AWS S3

WORK EXPERIENCE

Software Engineering Intern

Summer 2025

Unadat, New York, NY

- Built automated data extraction systems for PDF/email processing, reducing manual data entry time by 90%
- Developed RESTful APIs with MySQL database integration for internal notification systems
- Maintained and extended web applications using PHP, JavaScript, and MySQL

Curriculum Designer & Mentor

January – June 2023

The Dynamic Ninja, Bangladesh

- Designed calculus curriculum for students preparing for competitive engineering entrance exams

LEADERSHIP EXPERIENCE

IT Technician | Assistant Manager

October 2024 – Present

CUNY Hunter College Social Science Computing Lab, New York, NY

- Supervise and coordinate a team of 10 student workers, managing shift schedules and task delegation
- Train new hires on lab procedures, troubleshooting protocols, and customer service standards
- Support 300+ students and faculty every semester with research tools including Stata, SPSS, and Excel

PROJECTS

Cloud File Manager

Technologies: Go, JavaScript, Docker, AWS S3

GitHub: github.com/b-mozz/cloud-filemanager

- Built Go web server with dual-layer storage architecture: local filesystem with in-memory caching
- Engineered file chunking system for efficient handling of large uploads and concurrent access
- Containerized with Docker; architected for AWS S3 integration and mDNS-based local device discovery

Cryptocurrency Price Tracker

Technologies: Node.js, Express.js, JavaScript, RESTful APIs

GitHub: github.com/b-mozz/crypto-alert-web | App: [Live Demo](#)

- Real-time email notifications when prices hit user-configured thresholds for tracked cryptocurrencies
- Integrated CoinGecko API for live market data with responsive portfolio dashboard

NYC Neighborhoods Visualization

Technologies: Python, Streamlit, Pandas, Folium, Matplotlib

GitHub: github.com/b-mozz/zip-code-explorer | Demo: [Live Demo](#)

- Interactive web app analyzing NYC zip codes with choropleth maps and demographic charts
